

Audit Ready Compliant Cloud™ (ARCC) Managed Service for Life Sciences

At Court Square Group,

we specialize in providing robust, compliant, and audit-ready cloud solutions tailored specifically for the unique needs of pharmaceutical, biotechnology, and contract research organizations (CROs). With our ARCC Managed Service solution, your organization can confidently navigate the complex landscape of regulatory compliance, allowing you to focus instead on advancing drug development and innovation.

UNLOCK COMPLIANCE AND EFFICIENCY WITH ARCC™

In the highly regulated world of the Life Sciences industry, adhering to all compliance regulations, particularly 21 CFR Part 11, is non-negotiable. Court Square Group's ARCC solution was specifically designed to meet and exceed these stringent requirements, providing a qualified and validated cloud environment as the secure foundation for your critical applications and ensuring data integrity, audit readiness, and seamless compliance throughout the clinical and regulatory lifecycle.

ARCC AS A COMPLIANCE METHODOLOGY

Beyond just hosting, ARCC represents a comprehensive methodology for ensuring compliance at every level of your infrastructure.

Whether you're looking for Court Square Group to host your environment or want to utilize a third-party environment, our compliance wrapper adds an additional layer of assurance, encompassing processes, procedures, and documentation to meet regulatory requirements.

Plus, Court Square Group carefully manages and qualifies its vendors so we can always guarantee the integrity and reliability of the services provided within our ecosystem.

KEY BENEFITS OF ARCC

Court Square Group is dedicated to supporting the technology needs of Life Sciences companies, from preclinical research to FDA compliance and beyond. With ARCC Managed Service, you benefit from:

Life Science Expertise

Our team of specialists understands the nuances of the Life Sciences industry and is committed to delivering tailored solutions to meet your unique requirements.

Total Data Security

Protect your sensitive data with our secure, 21CFR Part 11 compliant hosting environment, backed by robust infrastructure and stringent security measures. All data is securely hosted, backed up daily, and protected against potential threats.

Ongoing Compliance Assurance

Our solution ensures that your applications remain validated throughout their lifecycle, with ongoing qualification efforts and seamless integration of updates. Thanks to this continuous qualification process and comprehensive compliance management, you can ensure total compliance with FDA data regulations. To maintain the validated state of your applications, you need to rely on a solution based on ARCC to maintain the qualified state of the environment those applications are running in.

Seamless Scalability

Consolidate your applications in a single, regulated environment, streamlining operations and simplifying compliance management – but easily scale your hosting environment according to your evolving needs, with the flexibility to accommodate growth and changes in your organization.

Total Peace of Mind

Focus on driving innovation and advancing your research agenda, knowing that your IT infrastructure is in capable hands.

GET STARTED WITH COURT SQUARE GROUP

Choose Court Square Group's Audit Ready Compliant Cloud™ (ARCC) Managed Service and embark on a journey towards enhanced compliance, efficiency, and innovation in the **Life Sciences industry**.

As a leading managed services technology company dedicated to empowering those who change lives in the pharmaceutical and life sciences space, Court Square Group is the leading provider of Audit Ready Compliant Cloud Infrastructure solutions. Our cloud, collaboration, and regulatory submission solutions streamline processes across the development and manufacturing lifecycle, effectively minimizing costs, simplifying complexities, and mitigating risks associated with regulatory information sharing, storage, and submissions.
