

Life Science LaunchPAD™

Propel, **A**ccelerate, **D**evelop

Focus on the Science and Leave Your IT to Us

Does your life science start-up need a single repository that organizes, streamlines, and effectively manages your organization content and document needs? Life Science LaunchPAD™ offers an Audit Ready Compliant Cloud (ARCC) IT infrastructure that not only meets 21 CFR 11 requirements but also simplifies and streamlines the compliance side of the business for life science start-ups.

The Starting Point for Your IT Infrastructure

In the fast-paced world of early-stage life science start-ups, dedicating the time and resources towards its science, partnerships, staffing, and funding are typically the primary concerns. And establishing a compliant infrastructure for data hosting, sharing, and collaboration often feels like it's out of reach for the limited resources most start-ups are working with. **Now, there's a solution.**

Meet Life Science LaunchPAD with RegDocs365™

Life Science LaunchPAD is a ready-to-use, preconfigured solution, providing a strong foundation for efficient departmental organization and corporate governance. Unlike other content management and storage systems that only offer cloud-based storage, Life Science LaunchPAD provides your team with a structured content repository that includes built-in data governance and a file structure that meets regulatory requirements.

Flexibility with Structure and Consistency

Designed with the flexibility to customize according to your company needs, Life Science LaunchPAD provides the structure and consistency preferred by investors and large industry partners while scaling seamlessly with your organization as it grows, accommodating additional departments and ensuring consistent cross-department and external partner collaboration.

Key Features of Life Science LaunchPAD

Out-of-the-Box Ready with Customizable Possibilities from the Start

- Preconfigured company structure for quick deployment
- Built-in user level security for internal and external collaborators, so you don't have to compromise on security by giving equal levels of security access to all users
- Customization options to adapt to your unique requirements

Consistency Across Departments

- Facilitates collaboration by providing a consistent repository for all data and documents
- Prevents the chaos of multiple, disjointed systems within start-up environments
- Cloud hosting for easy access and content sharing from any location
- Organize multiple repositories into a single solution

Fully Compliant Infrastructure

- Hosted in the Audit Ready Compliant Cloud (ARCC)
- Meets 21 CFR Part 11 requirements, ensuring regulatory compliance
- Always GxP audit-ready with data governance plan in place
- Robust security measures to protect your intellectual property

Affordable and Expandable

- Minimal upfront costs with monthly subscription model for scalability
- ARCC cloud hosting eliminates concerns about future IT infrastructure
- Managed SaaS includes maintenance, backups, and updates

What's Included in Life Science LaunchPAD

- RegDocs365 secure client-specific environment
- Data backup and disaster recovery services
- Comprehensive system training
- Ongoing system/application support

Ready to Transform Your Start Up IT Infrastructure?

While you may not think you need the regulatory structure and security Life Science LaunchPAD offers, leveraging this functionality from the start will minimize the time-consuming and costly rework required while you are scaling your business. **Propel your organization through early research to regulatory submission.**
