

# Bring Order to Chaos for Your Rescue Trials with the Power of AI

When a sponsor takes a clinical trial away from a CRO for any reason, the transition is rarely smooth. Documents are often handed over in a disorganized state – sometimes dumped without proper classification or metadata – creating confusion and costly delays. Time is money, and sorting through this chaos manually can be overwhelming.

Court Square Group's advanced AI-driven solution streamlines the rescue trial process by automatically classifying, cross-referencing, and integrating critical regulatory documents. By bringing structure to the disorder, our tool ensures a seamless transition, reducing stress and saving valuable time and money.

## THE BENEFITS OF LEVERAGING AN AI SOLUTION

### Manual Effort Reduction

This automated solution minimizes manual processing time by 75%, allowing efficient review of classification engine results. Plus, less manpower required means additional cost savings.

### Enhanced Accuracy

Reduce human error with precise calculations by reducing reliance on manual document reviews and automatically identifying and assigning metadata to documents.

### Accelerated Decision-Making

Transform piles of documentation into actionable insights in a fraction of the time after quickly classifying and filing documents into their correct locations.

### Organized and Traceable Document Management

This feature efficiently renames documents, retaining the original and updated names, allowing for traceability.

### Site Document Processing

This solution streamlines site-specific document processing for rescue trials by using data from the 1572 form to generate a comprehensive view of all trial sites, ensuring accurate document placement and organization.

## COURT SQUARE GROUP'S ETMF AUTOCLASSIFICATION SOLUTION LEVERAGES AI FOR:

21 CFR Part 11 audit trail

Integration with hybrid CTMS

DIA TMF Reference Models alignment

Unstructured content transformation

Built-in quality control checks

Automatic OCR for content extraction

Document collection and synchronization

AI capabilities for data extraction

## WORKING WITH COURT SQUARE GROUP

As a leading managed services technology company dedicated to empowering those who change lives in the pharmaceutical and life sciences space, Court Square partners with the market's most innovative AI technology companies to provide platforms and point solutions that accelerate decision-making, reduce operational costs, and improve company-wide productivity levels.

Our innovative AI tools and expertise in the life sciences industry make us the trusted partner for CROs and sponsors navigating the complexities of rescue trials. Let us help you ensure a seamless transition, accurate documentation, and cost-effective solutions for your clinical trials, rescue or not.
