SIEMENS

A Modern, Low Risk, Low-Cost Alternative to SAS

Life science teams have long depended on SAS Software for analytics, data management, and regulatory workflows. But growing data volumes, tighter timelines, rising costs, and inflexible compute models are making it harder to keep up. Now there's a strategic alternative.

Siemens SLC is an enterprise-grade solution designed to run existing SAS programs with little to no change—within a familiar environment your teams already know. It supports SAS, Python, and R, offers cloud-ready and on-prem flexibility, and enables a cost-effective transition without disruption plus a seamless integration with CoPilot.

Backed by Siemens, SLC helps organizations reduce costs, improve productivity, and modernize analytics... without extensive rewrites.

Through a partnership with Court Square Group and Triam, transitioning is now practical and low risk. Their SAS-to-SLC Rapid Target Pilot provides a structured, compliant path to evaluate and adopt SLC with confidence.

Delivered via Court Square Group's Audit Ready Compliant Cloud (ARCC), this unified solution combines validated infrastructure, powerful analytics, and expert implementation—so you can modernize faster with less risk.

As an alternative, if you simply want to move away from SAS, Triam offers a tailored Siemens SLC solution with little to no services required.

KEY BENEFITS INCLUDE

High compatibility with existing SAS programs and workflows

Built-in support for GxP and regulatory requirements

Lower long-term software and infrastructure costs

A clear, auditable path from pilot to production

Scalable, cloud-based analytics architecture

Copilot Assistant for SAS, R and Python programs

WHAT EACH PARTNER BRINGS

Siemens SLC

Siemens SLC and SLC Hub are designed to execute existing SAS code with minimal disruption. It enables organizations to evaluate compatibility, modernize analytics platforms, and improve cost structure, without retraining teams or rewriting core workflows. Backed by Siemens, SLC offers enterprise credibility and long-term platform confidence.

The Siemens logo consists of the word "SIEMENS" in white, uppercase letters, centered within a dark blue square.

Court Square Group

Court Square Group provides hosting through its Audit Ready Compliant Cloud (ARCC), a validated cloud environment purpose-built for life sciences and other regulated industries. ARCC delivers the controls, documentation, and audit readiness required to support GxP-compliant analytics workloads, reducing infrastructure risk and compliance burden.

Triam

Triam leads assessment, remediation, and execution. With deep expertise in both SAS and SLC, Triam helps organizations understand code portability, remediation effort, and production readiness. Their hands-on, implementation-driven approach reduces risk, accelerates evaluation, and ensures a smooth transition from pilot to production.

RAPID TARGET PILOT - FROM EVALUATION TO PRODUCTION, BY DESIGN

This joint offering pairs a focused and tailored Proof of Concept with a proven production migration pathway. This targeted pilot is designed not as a technical demo, but as a practical evaluation aligned to regulatory expectations, production workflows, and organizational risk tolerance.

The Rapid Target Pilot can be run in parallel with existing systems. The Code Analyzer identifies compatibility gaps and accelerates conversion. This makes it easy to assess and transition analytics workloads at your own pace, validate outputs side by side, and move forward with confidence, without disrupting mission-critical or regulatory-facing operations.

START THE EXPLORATION PROCESS

Launch a Rapid Target Pilot with Court Square Group, Siemens, and Triam to evaluate SLC compatibility, cost benefits, and production readiness, before committing to change. Contact Court Square Group or Triam to get started, today.

A blue rectangular box containing contact information for Court Square Group. At the top is the logo with the tagline "Drive The Business Of Science". Below are the website "courtsquaregroup.com" and email "info@courtsquaregroup.com" with icons. At the bottom, in a red bar, is the phone number "413-746-0054" with a phone icon.A white rectangular box with a blue border containing contact information for Triam. At the top is the Triam logo. Below are the website "triamltd.com" and email "info@triamltd.com" with icons. At the bottom, in a blue bar, is the phone number "330-814-6230" with a phone icon.Two dark blue rectangular boxes. The left box contains the text "Software Partner Sell Service" and "SILVER" with a large white arrow pointing right. The right box contains the Siemens logo "SIEMENS" in white.
